PROJECT PITBULL

COMMUNITY EMBRACED DEFI PROJECT

WHAT IS PITBULL?

Pitbull is a self-staking token abandoned by its creator, raised by the community. Created on March 17, 2021 on the Binance Smart Chain network with contract renounced and Liquidity burnt, Pitbull hasgrown into a fully functional, decentralized, 100% community-driven project and has become a social experiment in which the investors have integrated into the community both from a community and development standpoint. It has the properties of every trade 2% fee redistributed to all holders and2% additional fee on sell trades added to the liquidity pool.

SECURITY

As half of total supply has been burnt into a dead address in the beginning and the liquidity pool has been burnt, it is impossible to modify Pitbull's contract for further changes. PITbull is a totally safe community driven project which has been declared rugproof by various auditors:

Result of the audit from Techrate: (audit report is available on: techrate.org and our platforms)

     - No high severity and security issues

     - No medium severity issues

     - No low severity issues – No Owner Privileges

With a developing community, the team has recently registered and created a multi-sig account wallet which requires multiple owners of the wallet to approve any transaction and changes. All donations and funds will be kept in Gnosis multi-sig wallets at gnosis-safe.io. PITs and funds will be kept safe within the community members.

ALL PITBULL TRANSACTIONS CAN BE FOUND ON THE BSCSCAN IN THIS LINK:

HTTPS://BSCSCAN.COM/TOKEN/0XA57AC35CE91EE92CAEFAA8DC04140C8E232C2E50

UNIQUE SIDES OF PITBULL TOKENOMICS

PITBULL HAS THREE PROTOCOLS IN EACH TRADE:

2%

REFLECTION

2% fee redistributed to all holders including black hole

2%

LIQUIDITY ACCUMULATION

2% fee on sell trades added to the liquidity pool by smart contract locked forever

50%

BURNING

50% burnt to the black hole, getting bigger from the fees

TOTAL SUPPLY
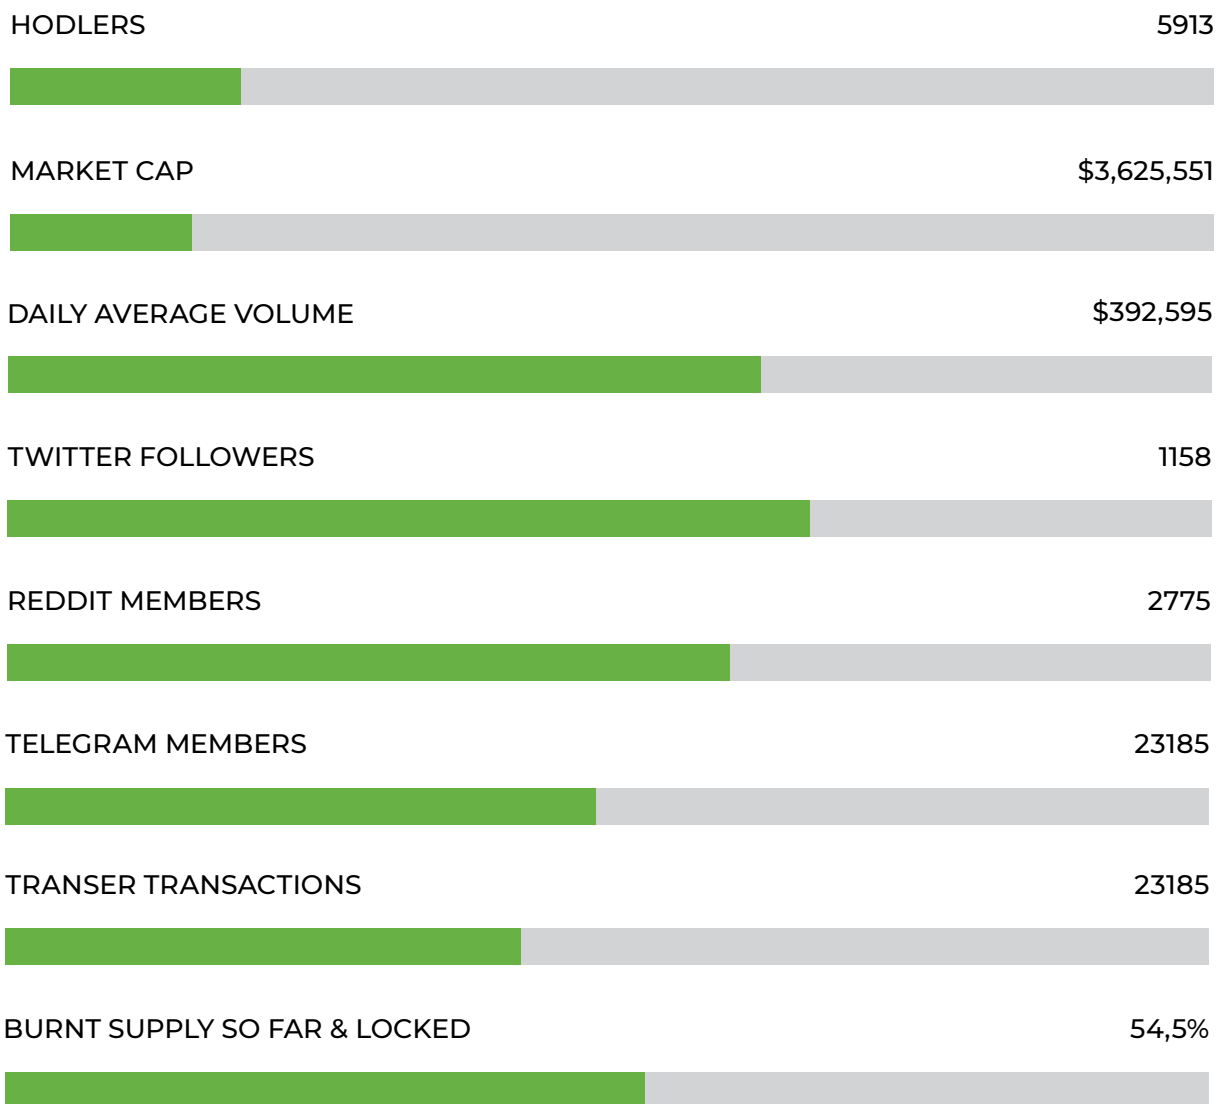

100%
SUPPLY

100,000,000,000,000,000 PIT

TRADE LIMIT

500,000,000,000,000 PIT
IS THE MAXIMUM LIMIT PER TRADE

HIGHLIGHTS OF PIT WITH ATHS

The stats here below are based on the early days (17 March to 31 March, 2021)

HODLERS   5913

MARKET CAP $3,625,551

DAILY AVERAGE VOLUME $392,595

TWITTER FOLLOWERS   1158

REDDIT MEMBERS   2775

TELEGRAM MEMBERS   23185

TRANSER TRANSACTIONS   23185

BURNT SUPPLY SO FAR & LOCKED   54,5%

AUTO-STAKING REWARD IN YOUR WALLET: A PLEASANT REASON TO BUY AND HOLD PIT

With the contract, Pitbull holders are getting 2% of each transaction over the Pitbull Token by other investors. Without staking or farming on other platforms, it is unique and easy to get a quite big percentage to your wallet as a reward of HOLDING. Only investing and holding PIT will provide more tokens as the transaction gets higher by time.

``**To see growing numbers of PIT balance in your wallet just by holding is priceless.**``

PITBULL & MILESTONES

PIT is now tradable on Decentralized Exchanges primarily on PancakeSwap of the BSC network. $PIT will be available soon for trading on CEXs starting on whiteBIT and other DEXs. Since its launch, huge steps have been taken by community members.

- BscScan updates and listing. PIT logo added to wallet interface
- WhiteBIT Exchange listing approved & $20.000 donation raised in 4 days
